

CWCSA GRAVITY WEIGHBRIDGE AUTOMATION

Gravity weighbridge automation is a standalone multi weighbridge transaction processing solution which delivers 24 x 7 x 365 for an instant return on investment. The solution provides operator controlled or automated deployments. An automated deployment eliminates the need for weighbridge operators and increases throughput and turnaround time at weighing points. Gravity weighbridge automation features include automatic number plate recognition, RFID, surveillance cameras, access booms, robot lights, display panels, handheld terminals, barcode scanners and motion sensors to automate your weighing operation.

Suitable for:

- Mining
- Quarries
- Waste & Recycling
- Transport & Logistics
- Agricultural
- Asphalt Plants
- Other...
